Qsirch 5.0

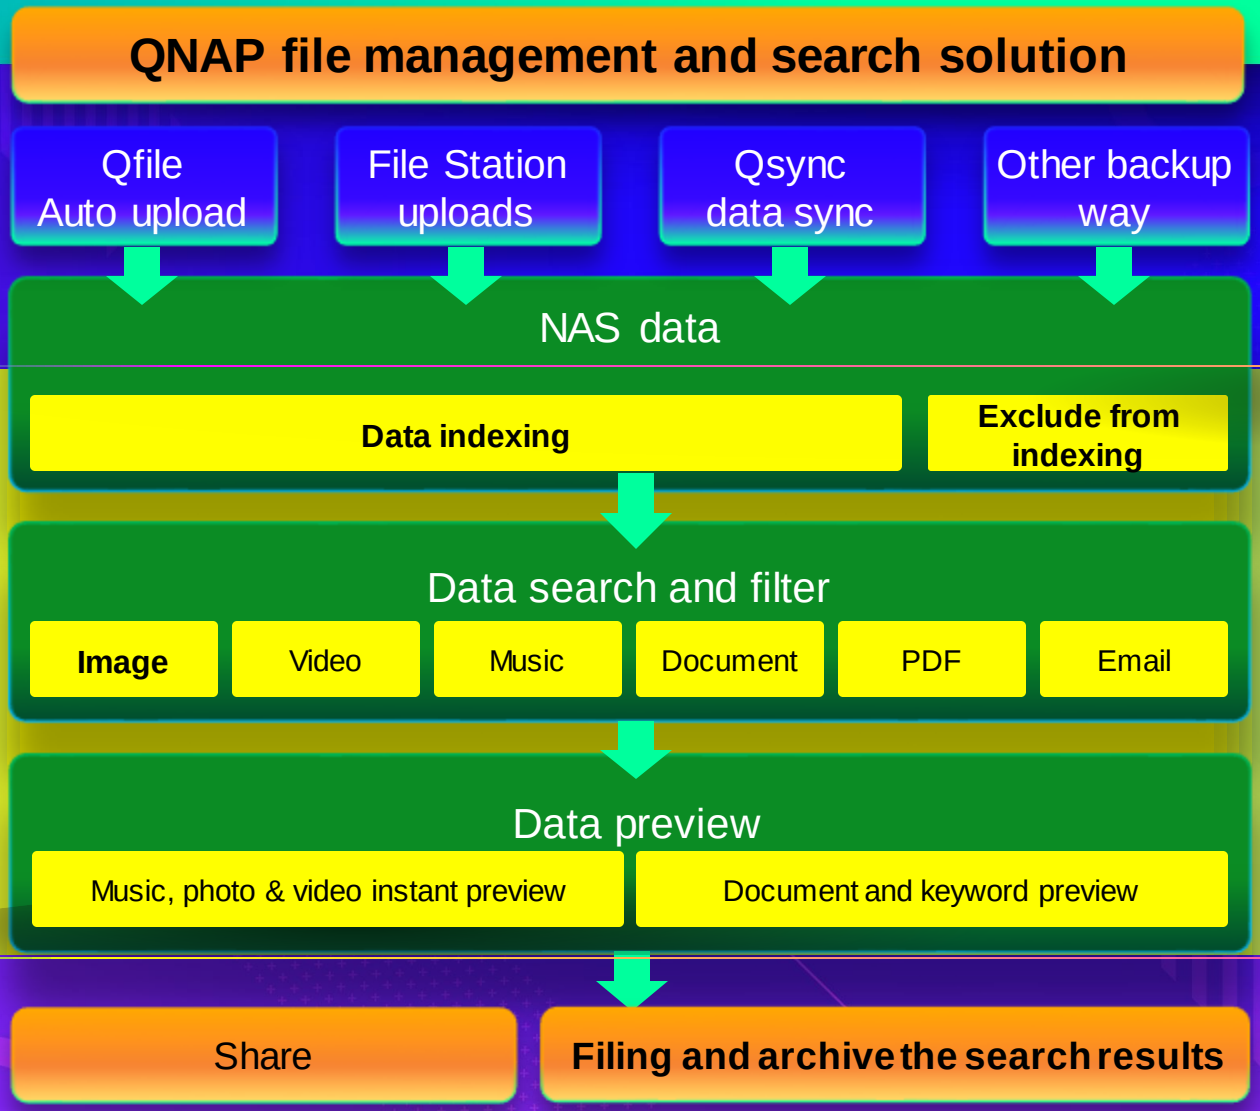
upgrade file management and search solution



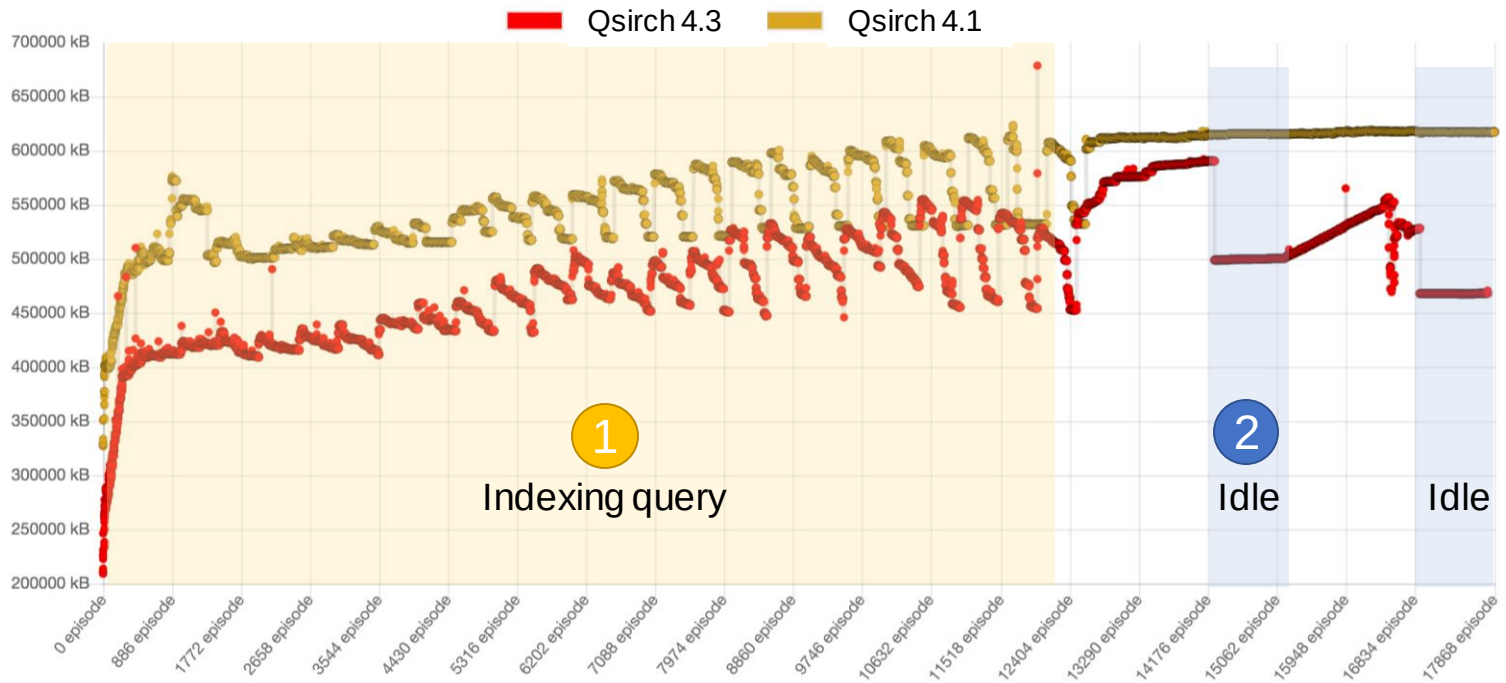
- More efficient indexing
- Five intelligent image search
- Filing and archive the search results

More Efficient Indexing

Reduce memory usage when indexing

From Qsirch 4.3, a new JRE optimizes the memory usage of NAS.

- The memory usage is reduced by 15-20% when indexing.
- The memory is released when Qsirch is idle and can be used by other applications.



Exclude the unnecessary data from indexing

Select to exclude the unnecessary data from indexing to reduce the resource usage.
The elcuded data will not be shown in the search result.

New

Exclude Folders

Excluding folders prevents Qsirch from indexing their contents.

Excluded folders (custom) Add Remove

Path
/Container
/Web

Excluded folders (system default)

Path
/printers

Exclude Files

Qsirch does not index excluded files.

Qsirch search results will not include files in "Excluded Folders" and "Excluded Files."

Excluded Files (Custom) Remove

Example: abc.zip or *.tm? Add

File List
*.tmp
*.log
~*

Five Intelligent Image Search

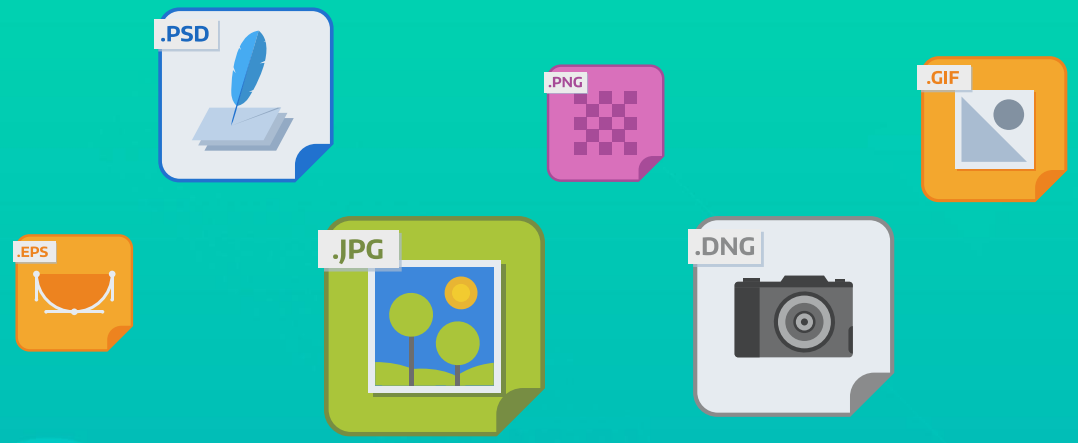
Intelligent Image Search

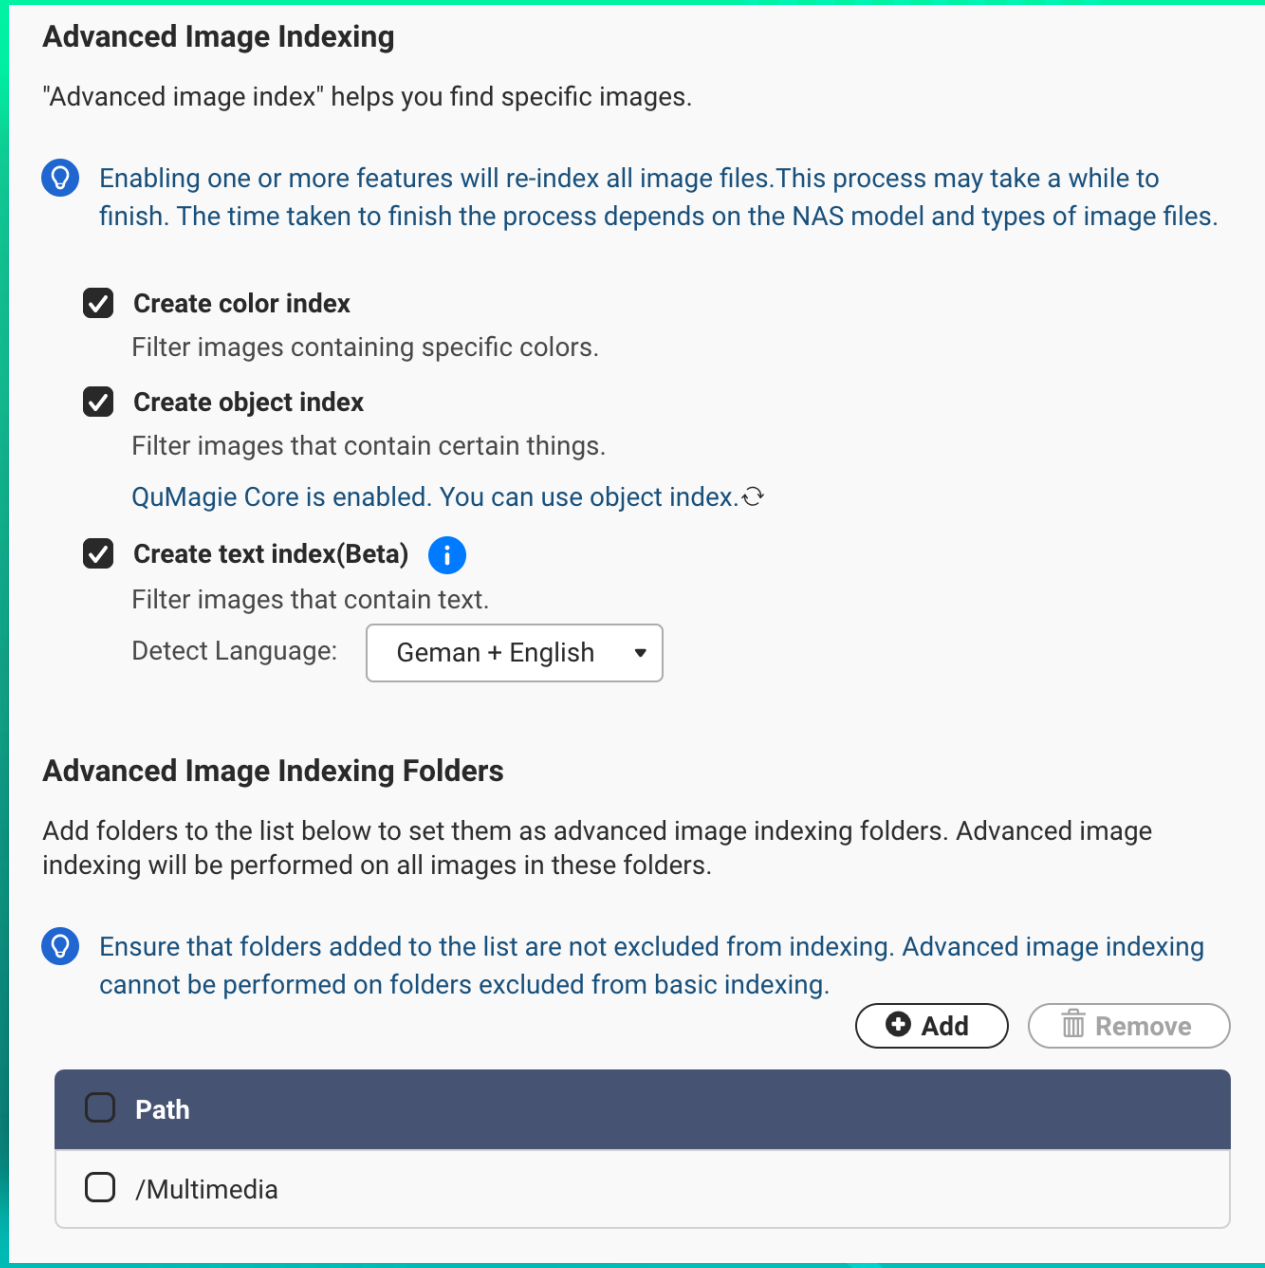
- New — Search by people
- New — Search text in image
- Search by things
- Search by color
- Search by map

Enable advanced image index

Advanced image index might consume more resource and time.

- Enable the advanced image search functions you need.
- Add advanced image index folders





PREMIUM

Search by people

Upload or select image included a person to search all his/her photos

PREMIUM

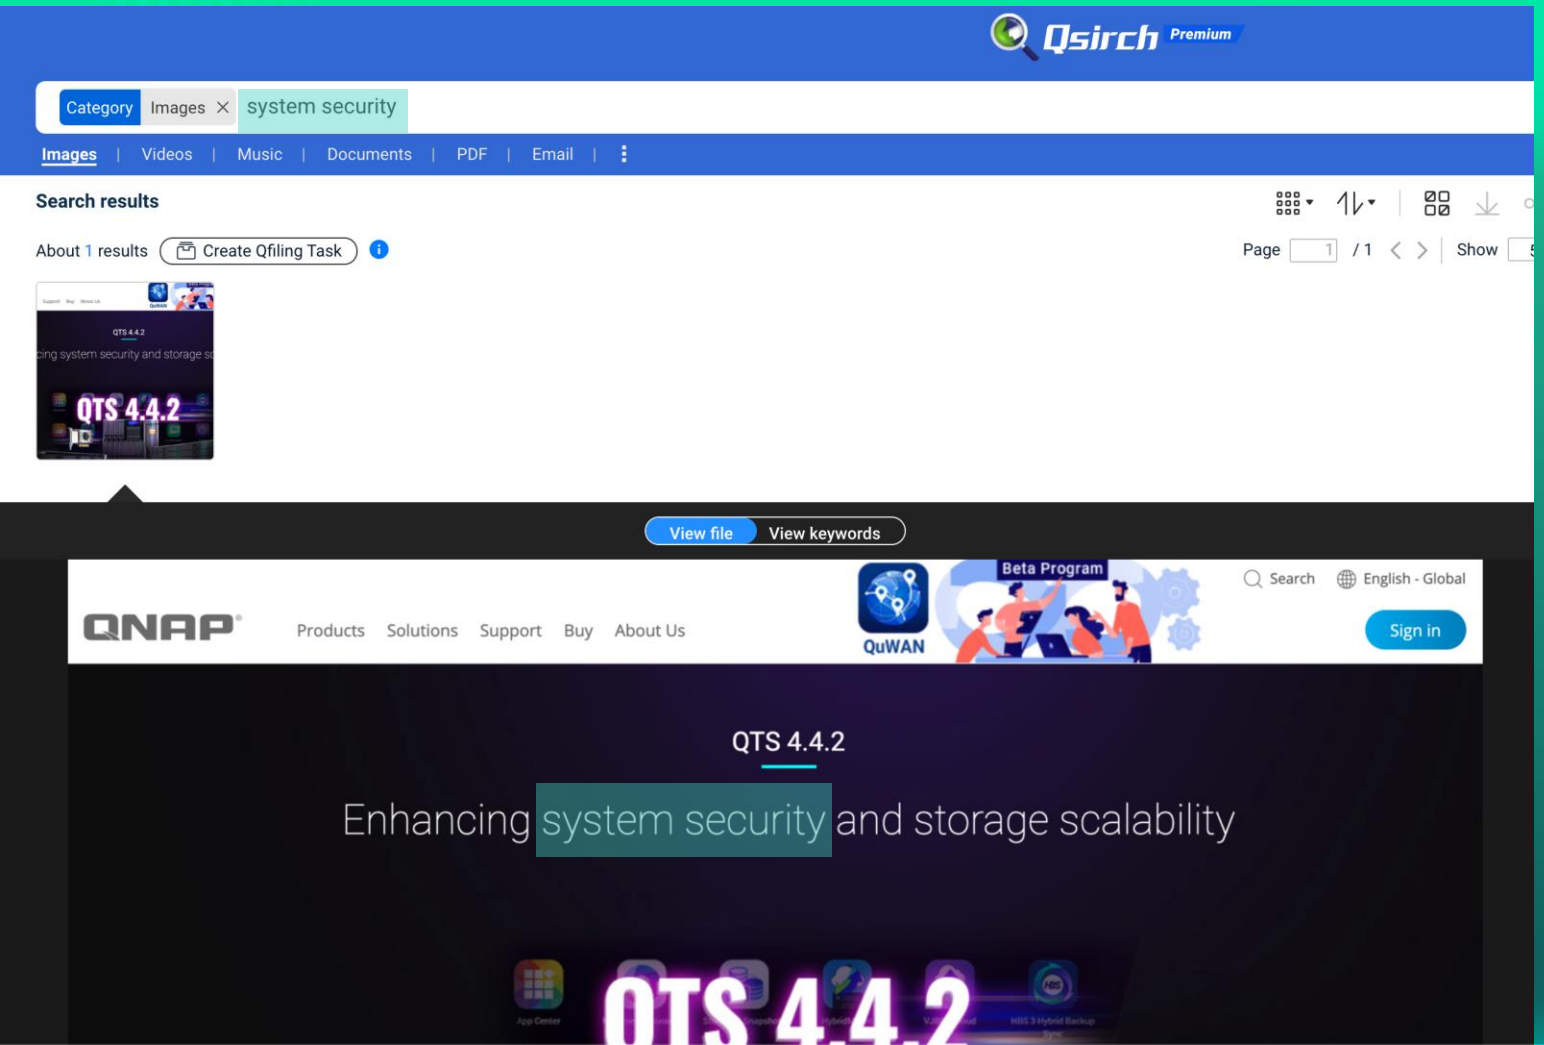
Usage example

For Sociable People

Can not find the photo taken with friends?

Upload or select image included the friend and Qsirch can help to find out all photos with your friend.

QCR helps to search text in the image



Search images with text which is automatically recognized by OCR.

- Support multiple languages: English, Traditional Chinese, Simple Chinese, German, Frech, Italian, Japanese, Greek
- Well recognization for printed words.

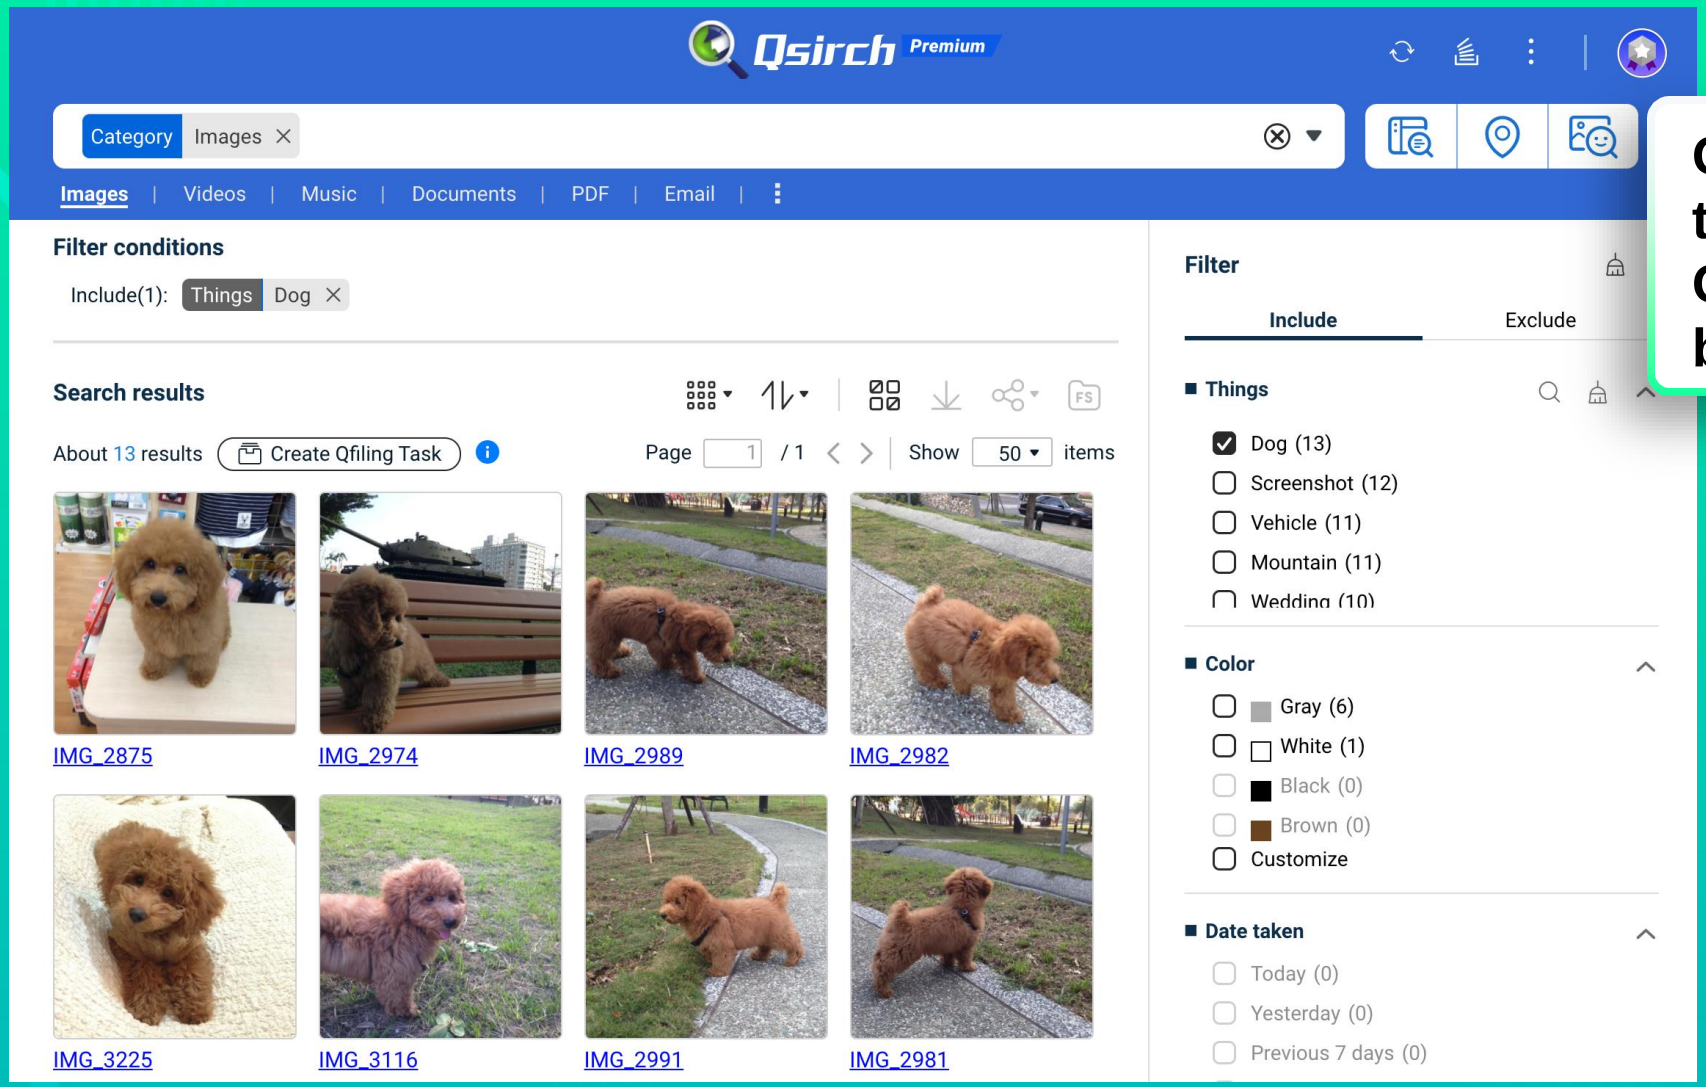
Usage example

For Sales Person

Find a specific customer in the mess business cards

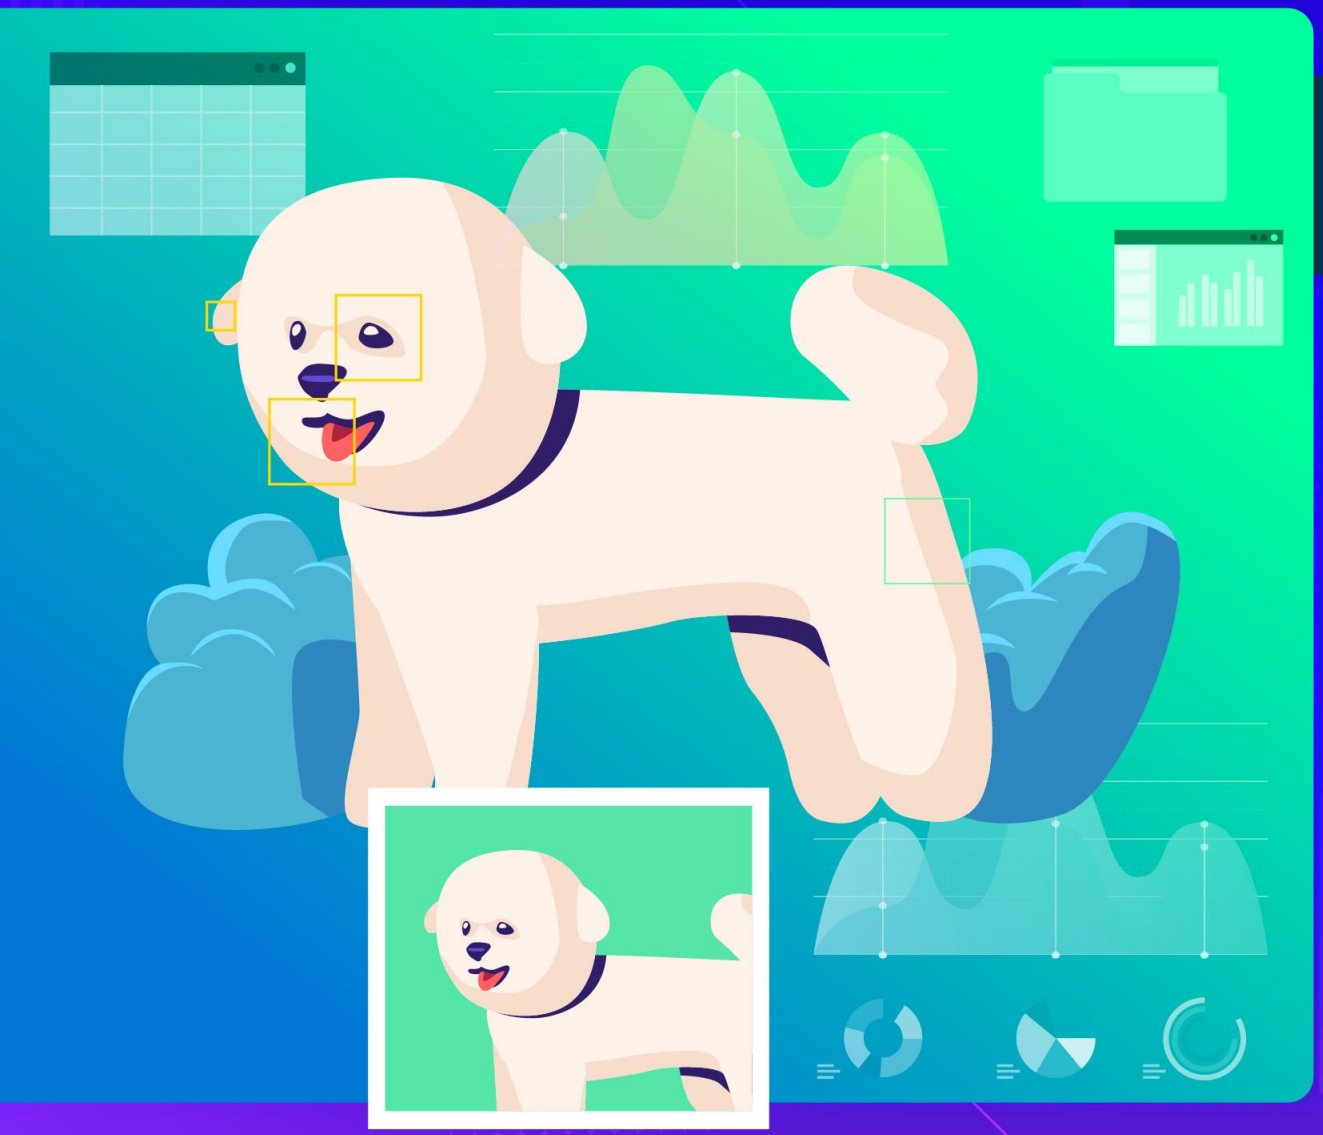
Upload the photos of business card to NAS and search by the keywords.

Search the things in the photo



QuMagie Core recognizes the things in photos by AI engine. Qsirch can search the photos by thing.

- Search the photos by thing by keyword or filter.
- QuMagie Core supports to recognize 390 things.



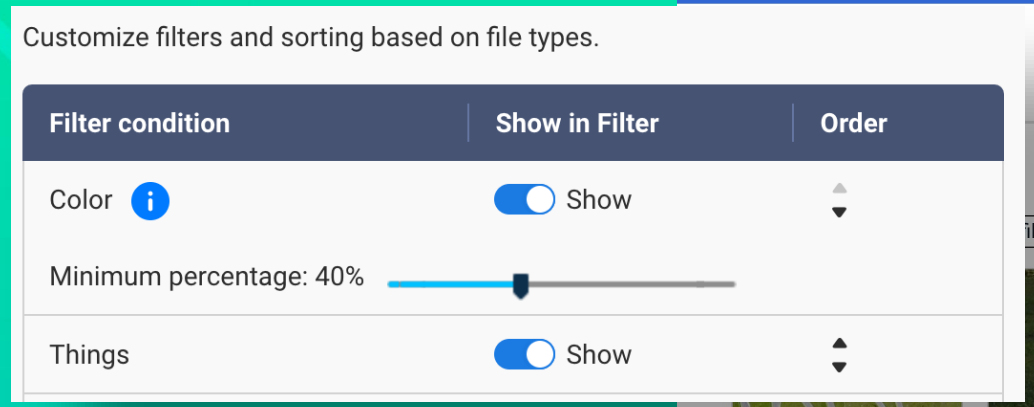
Usage example

For Cataholic And Dogaholic

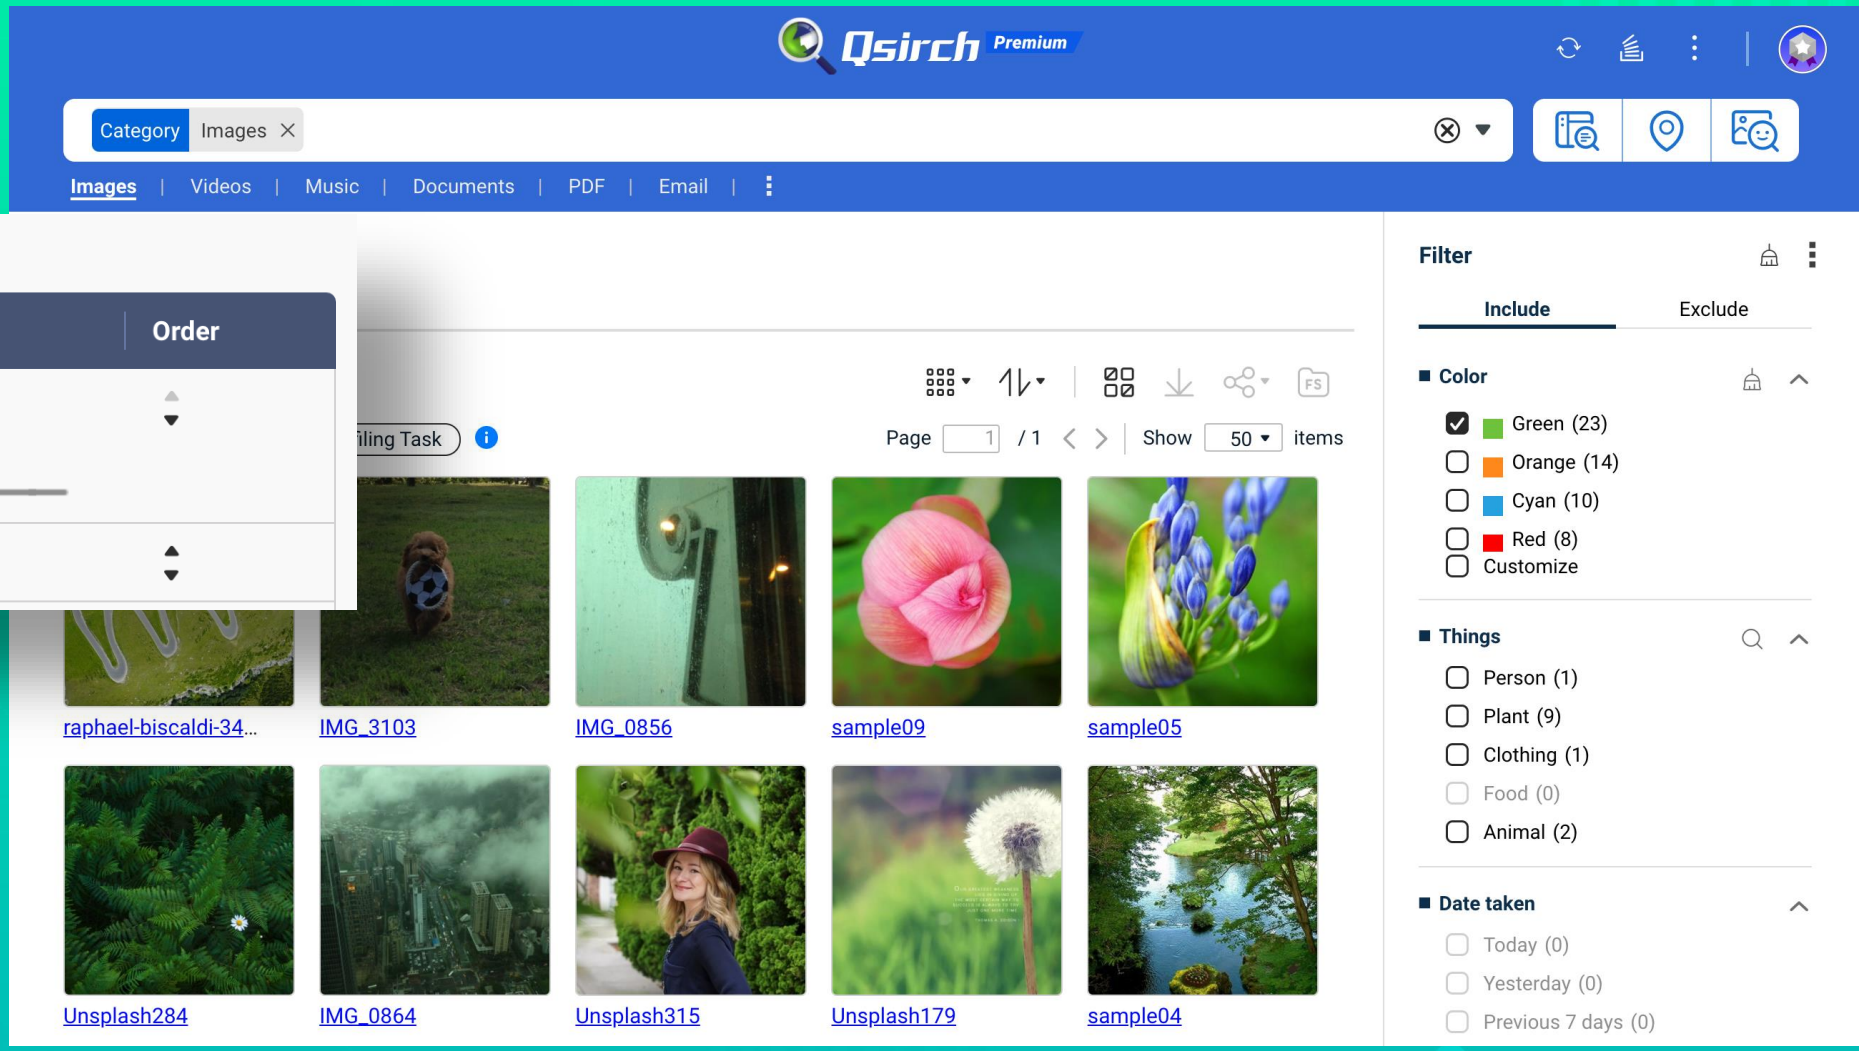
Find out your pet’s photo in a second

After backing photos to NAS, you can use keyword or filter to find out your pet’s photos.

Filter out the photos by color



- Setup the minimum percentage of colors in the filter results.



Usage example

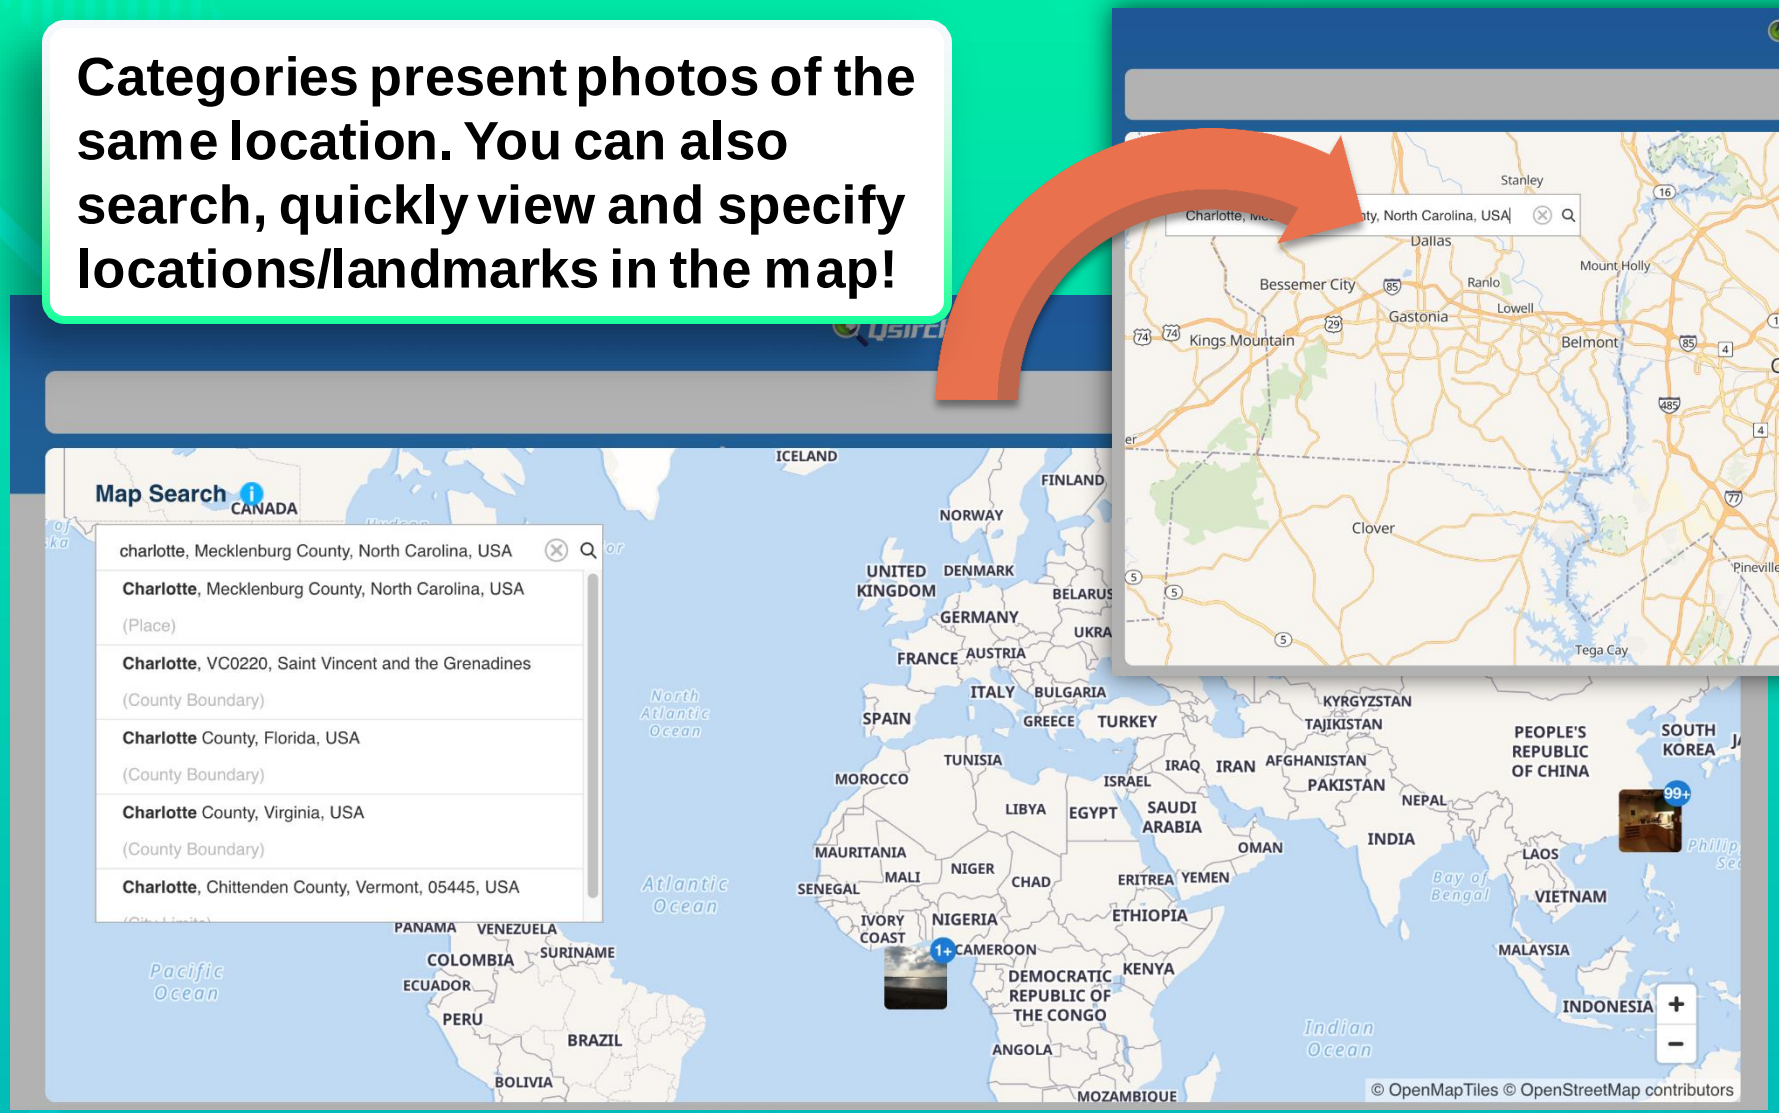
For Designer

Find out the elements in specific color

Select the specific color as a filter to search image you need.

Map Search
Quickly find photos of a specific location

Categories present photos of the same location. You can also search, quickly view and specify locations/landmarks in the map!



Usage example

For Traveler

See your footprints where you have traveled

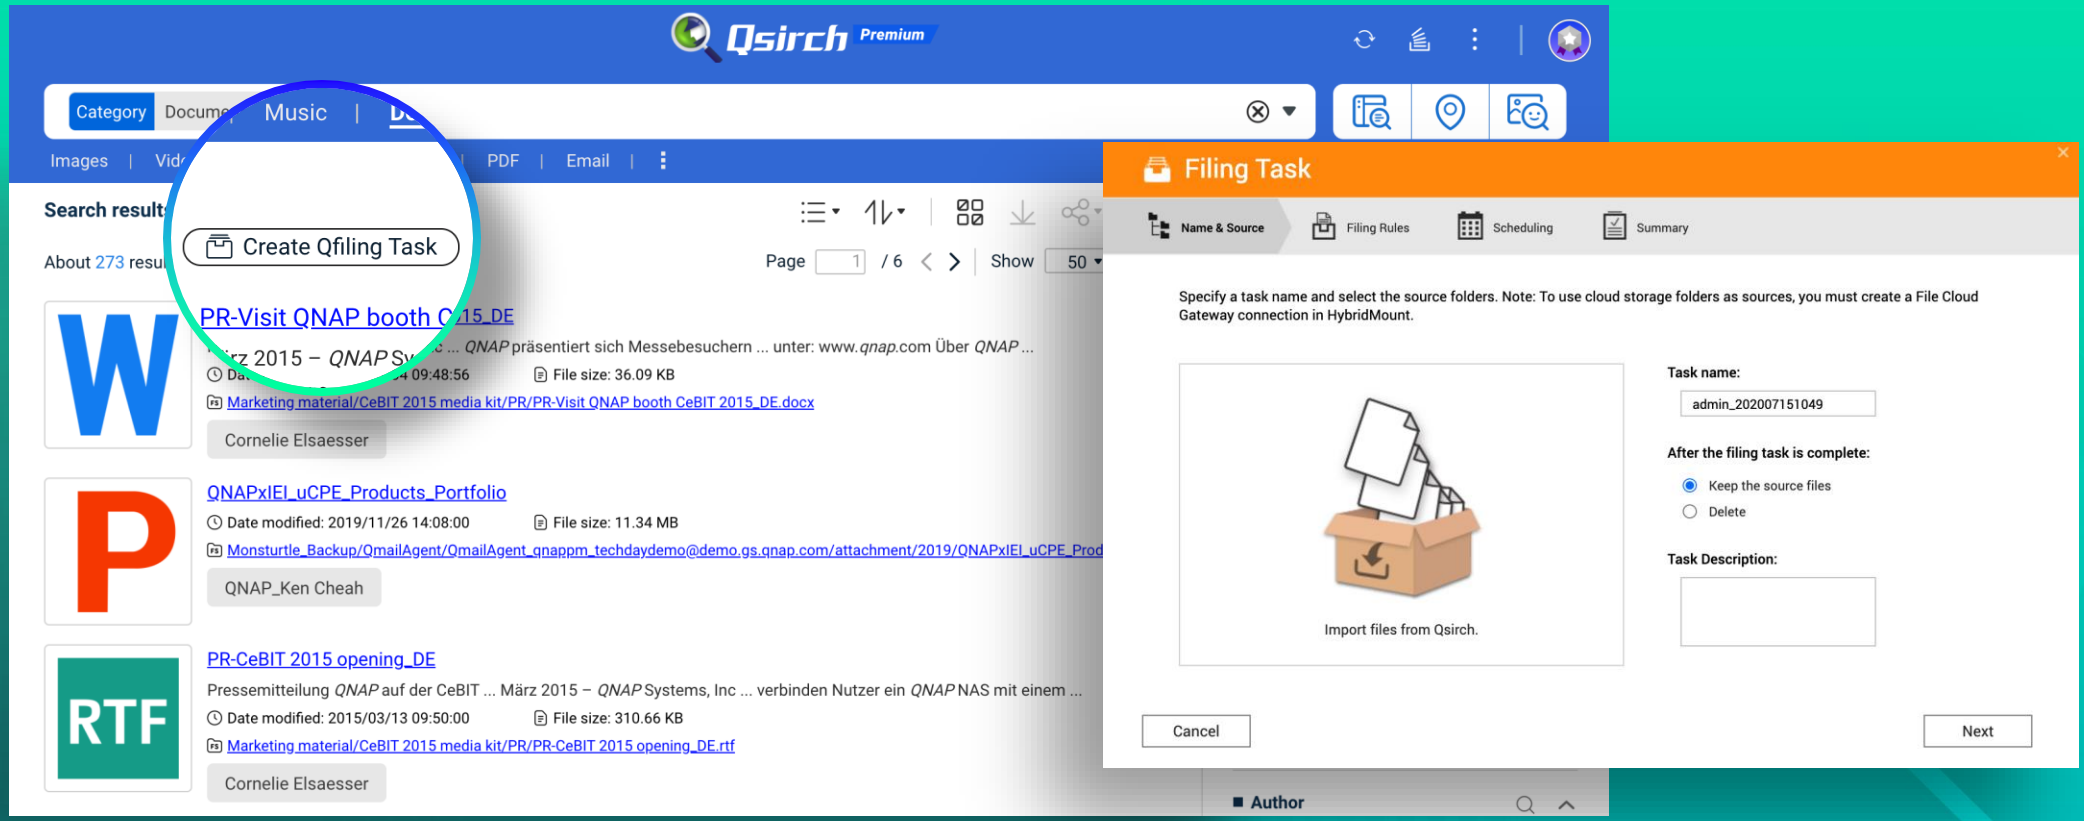
The map search shows all your photo with GPS information on the map. You can quickly view the photos taken around the world.

Filing And Archive The Search Results

PREMIUM

Filing and archive the search results by Qfiling

The search results might be scattered in many different folders.
You can file these flatten data to specific folder structures.

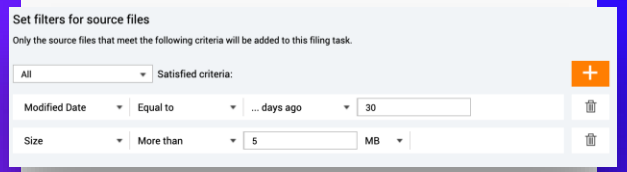


PREMIUM

Editing modules and filing schedule help your data managed all the time

File Filters

Select many filter rules including file size, modified date, and file extension with “and” / ”or” rule.



Editing modules

- Watermark
- Image2PDF
- Video transcoding
- Subtitle pairing
- Encryption & Decryption
- Compression

Destination folder structure

The file will be filing to the destination folder with structure you setup.

Conditions1 : Picture/Camera Brand/Date Taken
Conditions2 : Documents/Document Author

- Destination path
  - Picture
    - Canon
      - 2016-07-07
  - Document
    - J. K. Rowling

Schedule

One-time task
The search results will be filing once.

Scheduled task
The filing task will auto start by schedule. In every task, Qsirch will search again and import the latest results as filing source.

Search
“Contract”

Encrypt by
Qfiling

Archive by
Qfiling

Usage example

For Data Protection Officer

Encrypt business confidential data to meet GDPR compliant

Use Qfiling to batch encrypt and archive the data with specific keywords.

The best partner for efficient work

Enterprise

High-capacity with exceptional performance

TS-1685

- 16 bays,16-96 TB
- Intel Xeon 6-core 2.2 GHz
- 128 GB RAM
- 6 M.2 SATA 6Gb/s SSD slots for caching or caching pools to accelerate system performance.

SMB

High-end business NAS for greater performance

TVS - 872N

- 8 bays, 4-64TB
- Intel i3-8100T 4-core 3.1 GHz
- 8 GB RAM (up to 32 GB)
- 2 M.2 SATA 6Gb/s SSD slots for caching or caching pools to accelerate system performance.

SOHO

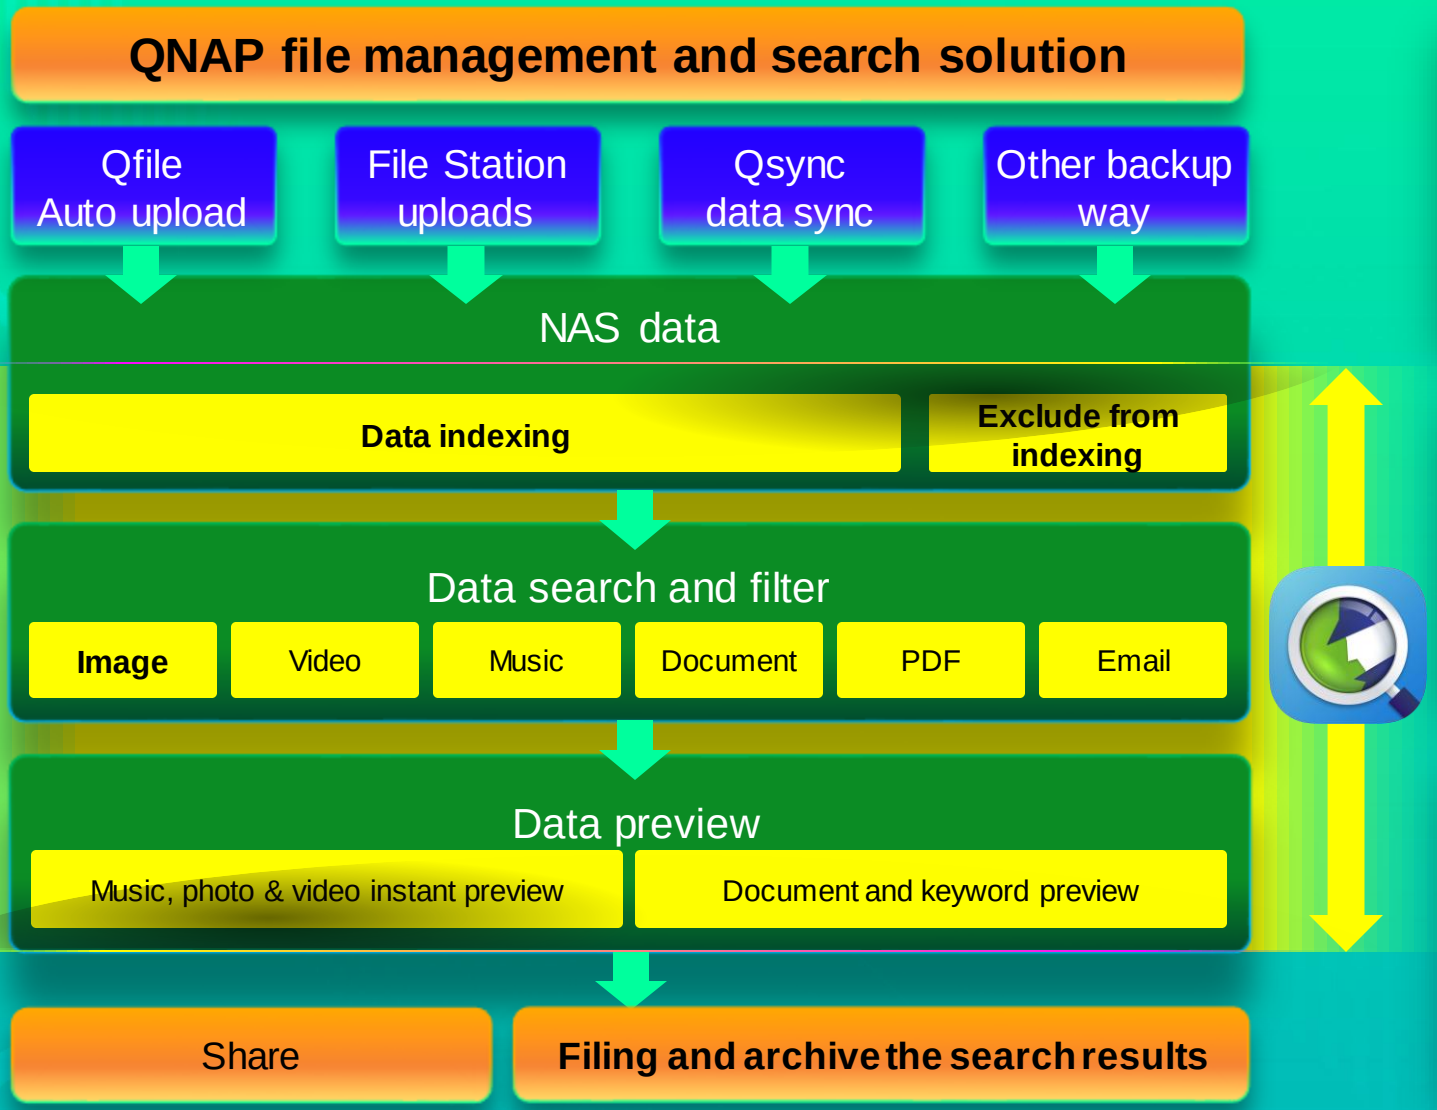
High performance 4-core studio

TS - 453D

- 4 bays, 4-24TB
- Intel Celeron 4-core 2.0 GHz
- 8 GB/ 4 GB RAM

Qsirch 5.0

upgrade file management and search solution



More efficient indexing

- The memory usage is reduced by **15-20%** when indexing.
- **Exclude folders or files** from indexing to reduce resource usage.
