OVERVIEW

The ONV-IPS31107PFM-2D series is a L2 gigabit uplink managed industrial PoE data switch independently developed by ONV. It has 7*10/100Base-TX RJ45 ports and 3*1000Base-X uplink

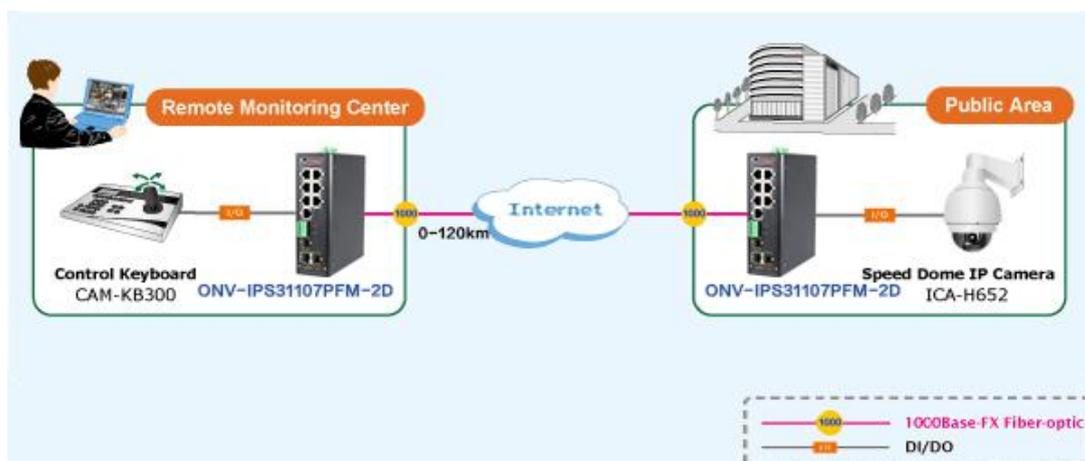

SFP slot ports. Port 1-7 can support IEEE 802.3af/at standard PoE power supply, single-port PoE power up to 30W, and the maximum PoE output power is 120W (at-240W). As a PoE power supply device, it can automatically detect and recognize the power receiving equipment that meets the standard and supply power through the network cable. It can supply power to PoE terminal device such as wireless AP, web camera, VoIP phone, industrial sensor through the network cable, and meet the network environment that needs high-density PoE power supply. It is suitable for intelligent transportation, rail transit, power industry, mining, petroleum, sea transportation. Industrial scenes such as metallurgy and green energy construction form a cost-effective, stable and reliable communication network.

ONV-IPS31107PFM-2D has L2 network management function and provides serial to network function. It can convert RS232/485 serial port into TCP/IP network interface, it can realize data bidirectional transparent of RS232/485 serial port and TCP/IP network interface. transmission. The serial device can immediately have the TCP/IP network interface function, connect the network for data communication, and greatly expand the communication distance of the serial device.
